Unit & Elective Descriptors

Diploma of Digital Media

Core units – year one

Introduction to Digital Media

Discover the increasingly important role that digital communications play in how organisations communicate with their clients and customers. Explore the potential of new digital and social media platforms by creating and sharing information and digital and interactive content like images, videos, games and online writing.

Digital Design

In this subject you'll be learning basic design and art direction skills using form, colour, typography and layout to create posters, brochures, advertisements and presentations. You'll also be learning how to create digital artwork, presentations and pre-press production for print and online advertising using the industry standard software Adobe Creative Suite (Photoshop, Illustrator, InDesign and Acrobat). You'll also be setting up your own WordPress blog to document your work.

Academic and Professional Skills

This unit aims to introduce students to the academic, communication and business skills required to be successful within a personal and professional context. It takes a broad and integrated approach in supporting students and preparing them for a happy and fulfilling career. Underpinned by the principles of positive education, the unit initially focuses on supporting students' transition into Macleay College and developing their academic performance. Through a range of engaging learning experiences, the continuing development of information literacy, communication and interpersonal skills will be encouraged and facilitated. Students then extend these concepts and skills to assist with the transition to their future career plans and goals though focussing on the transferable employability skills necessary to be effective in the emerging economy.

Written Communications

This subject introduces you to the key theories, styles, roles and importance of written communication in the digital media industries. You'll be learning about how to create and revise writing for a variety of outcomes including academic writing, copywriting, editorial writing, creative writing for digital platforms and writing for presentations. You'll also be learning how to evaluate appropriate forms and styles of writing for specific audiences in order to create powerful, impactful and engaging pieces of writing. The subject also includes the cultural heritage of written forms.

Research on Insight

This subject is all about the key source of creative ideas in advertising and media – research and insight. You'll be introduced to methods and strategies for conducting research designed to generate innovative observations and insights that can create opportunities and ideas. You'll be learning about the behaviour of contemporary audiences and their worlds and how they feel about engaging with innovative products and services.

Digital Visualisation

In order to effectively present proposals for digital media projects to clients, investors, team collaborators and stakeholders, digital media professionals require knowledge and skills for the visualisation of their concepts. These can be key visuals and concept art, informational graphics, or a storyboard and animatic for a video or multimedia project. This subject provides you with knowledge and skills you need to create, manage and cost various forms of visualisation required as professional digital media practitioners.

Design Thinking

Design thinking is the use of observation, analysis, empathy, problem solving, the generation of creative solutions, evaluation and critical appraisal which can be applied to any type of problem or scenario and which can benefit every business and industry. Creativity is quickly becoming the central guiding force in the world economy, displacing the importance of technology. This subject is designed to help you develop your creative/design thinking skills which will help you in your professional and personal life.

Social Media Strategy

This subject focuses on the creative process and the implementation and measurement of non-traditional media and online advertising. It looks at how creative ideas can be applied to a combination of new media formats, including online, social, experiential events, mobile and PR to create social media campaigns. The subject also covers brand strategies, testimonial style advertising and viral effects. You'll be learning about the role social media plays in developing advertising and media campaigns the use of analytical and data measurements to help measure a range of advertising performance measures.

Internship I

The internship subject helps you to develop informed insights and build valuable experience in the workplace. You'll be learning about the value of planning and preparation and its effect on your initial job search and subsequent career progression. It includes interview experience and the creation of relevant career application documents (e.g. resumés, cover letters etc.). In this subject you'll also be producing an online portfolio and a blog of your professional activities.

Electives – year one

Creativity and Innovation

This subject focuses on the role of creativity and innovation within the business environment. Theoretical frameworks which underpin the creative process are examined along with various approaches to innovation of products, distribution (online), pricing and promotional strategies. Creative and innovative solutions to marketing problems are examined using case studies.

Sales and Negotiation

This subject provides insights into various communication models and their value to salespeople and negotiators. You'll be learning about the strategies of influence and persuasion used by business negotiators to achieve agreement and compliance. By the end of this subject you'll have developed a strong understanding of the importance of effective communication in business.

Enterprise Innovation 1

This subject encourages entrepreneurial behaviour through the introduction of the principles of entrepreneurship, the process of creativity and innovation and the impact of this process on the success of new enterprise creation. On completion of this subject you'll have an increased understanding of entrepreneurship and the significance of innovation in small and medium sized enterprises (SMEs). The associated skills and techniques acquired provide a strong foundation for both new product/service development and the launch of an entrepreneurial or corporate new venture.

Enterprise Innovation 2

In recent years the high-profile success of young Australian entrepreneurs in building profitable business has been inspiring. Creating a new venture is a challenging task, one that requires specific knowledge as well as general business and entrepreneurial skills. The process of transforming creative ideas into commercially viable businesses continues to be a major challenge. Successful entrepreneurship requires more than merely luck and money. It is a cohesive process of creativity, risk taking and planning. Enterprise Innovation 2 exposes you to the process of entrepreneurship and creativity. This module is about learning by doing - applying entrepreneurial thinking to the development of viable business concepts. Upon completion, you'll know how to develop and evaluate innovative, sustainable, investment - ready business ventures. It's possible that some of the student-led projects may evolve into real-life ventures.

Business of Advertising

This subject helps you develop an understanding of the legal and regulatory frameworks that support professional advertising practice. You'll be exploring the impact that social, cultural and ethical considerations have on advertising. You'll also be examining business practices in advertising, including business structures, operating processes and external business relationships.

Radio Advertising and Podcasting

This subject is designed to give you theoretical and practical experiences in audio storytelling. It covers both broadcast and webcast in the form of radio copywriting and production as well as audio creation and production for podcasts. The subject introduces you to the subtleties, difficulties and advantages of using sound-only medium. You'll also be investigating the future of radio and other audio platforms as integrated mediums with digital, online, video and social media components.

Account Management

This subject offers specialised training for those students who are interested in the role of the account manager in advertising. It examines the two main areas of activity for an account manager - client and business management and project management and delivery.

Media Landscape

In this subject you'll be looking at various media channels and examining how they're used by the advertising industry to deliver strategic and effective communication messaging for consumers. It explains how research can define target consumer groups and provide media professionals with deep insights into consumer relationships with brands and communication platforms and how this information can be used to develop a media-scheduling plan. The subject explores the connections between communications strategies, media planning and investment and it also looks at job opportunities in these areas.

Writing for Digital Communications

This subject helps you develop your writing skills beyond just producing digital content so that you can create strong promotional ideas using ideation techniques specific to digital platforms. You'll be analysing the nature of copywriting and the future of the digital advertising space.

Consumer Behaviour

This subject explores what motivates and influences consumers in their decision-making process. It helps you understand what shapes these influences by looking at internal factors of perception, personality and attitudes, as well as the external factors of culture, social class, age and lifestyle. Included as part of this analysis, you'll be encouraged to critically appraise your own buying behaviour.

Digital Business Communications

This subject explores the exciting and changing world of digital communications, learning key tactics and tools for arising business opportunities. It covers the frameworks that underpin digital communications and includes learning about what drives increased use of social networks for business marketing success. You learn about the functionality of websites and how this meets the needs of an organisation and delivers information to end users.

Electives – year one (continued)

Coding Fundamentals

This unit introduces students to the language of coding and its relevance and implementation in advertising and digital media. Students will gain overarching knowledge about what coding is, what it is used for, and the role it can play in the development of advertising and digital media projects and future technological development. The unit will explore a number of industry standard coding languages and define parameters for decision making around which coding language is best suited to which business and technological issue.
